

Installation Services

CenturyYuasa in partnership with PosiCharge, offer Installation Services providing custom solutions and project management teams that help maximize your operator productivity – and your investment. Our team of experienced system integrators works closely with you to design and implement a cost-effective and entirely turnkey fast-charging solution to match your unique needs. Whether you're undergoing a new construction project, converting from internal combustion to electric vehicles, expanding your facility, or bringing fast charging into an existing location, our Installation Services consultants work closely with you to develop and integrate the ideal design layout for your new system. **Here are some of the value-added benefits we offer:**

PROJECT MANAGEMENT

- Complete project management from start to finish
- Coordination of battery and truck design and delivery
- Managing power and water installation, whether new or retrofit

CUSTOM INSTALLATIONS

- Mounting chargers on the floor, stands, walls, in overhead locations, in remote locations, between dock doors - virtually anywhere to create more useful space for your operations
- Cable management equipment that ranges from spring-loaded poles to custom-built overhead telescoping trolleys
- Automatic watering systems for battery health

OPERATOR TRAINING

- Driver and management training
- Battery maintenance and watering education
- Equalization strategy
- Data downloading support

START-UP SUPPORT

- Software programming
- Installation approval and verification
- System power-up

POST-SALES SERVICE AND SUPPORT

- Additional training as needed
- Additional customization, system improvements, trouble-shooting
